

 **DRYTREAT**  
Excellence in sealing products™

# WHY SEAL?

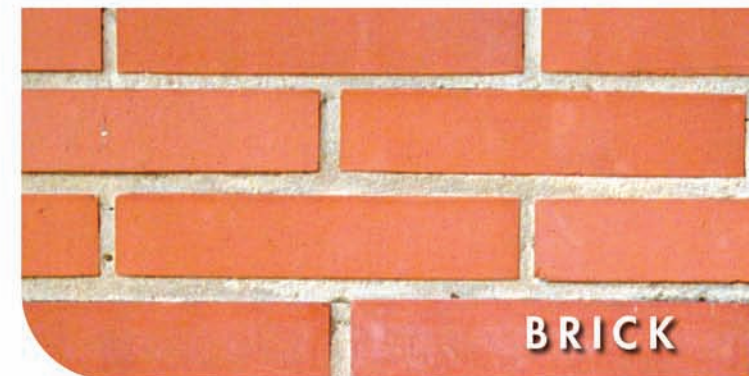

... protects against common household stains such as water, oil, salts and food

... keeps your surfaces looking beautiful longer

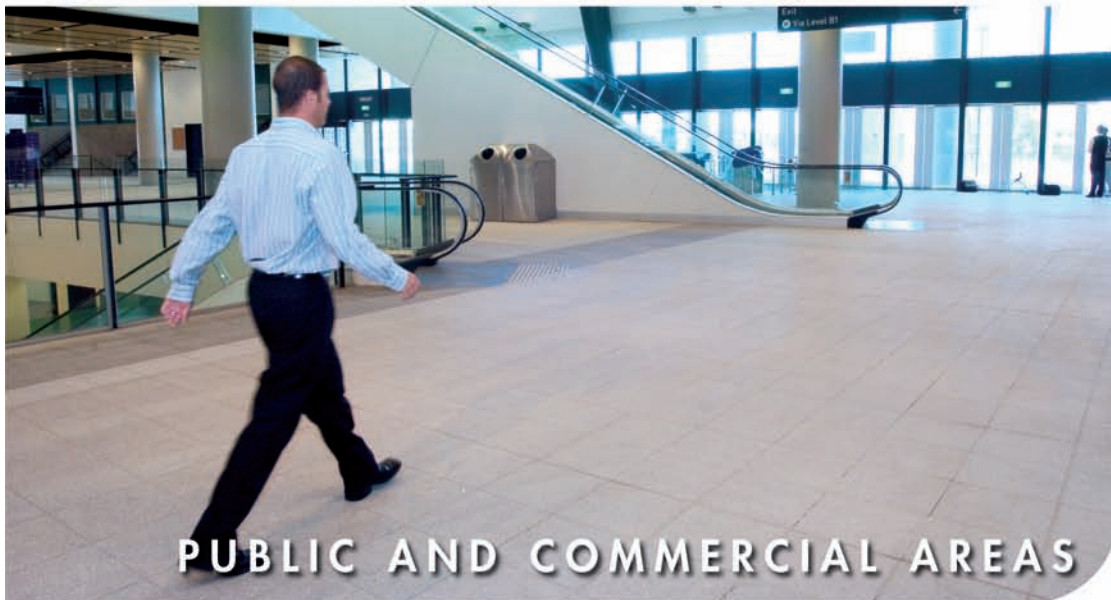

Dry-Treat sealers can be used on the following:

Dry-Treat sealers are suitable for a wide variety of applications

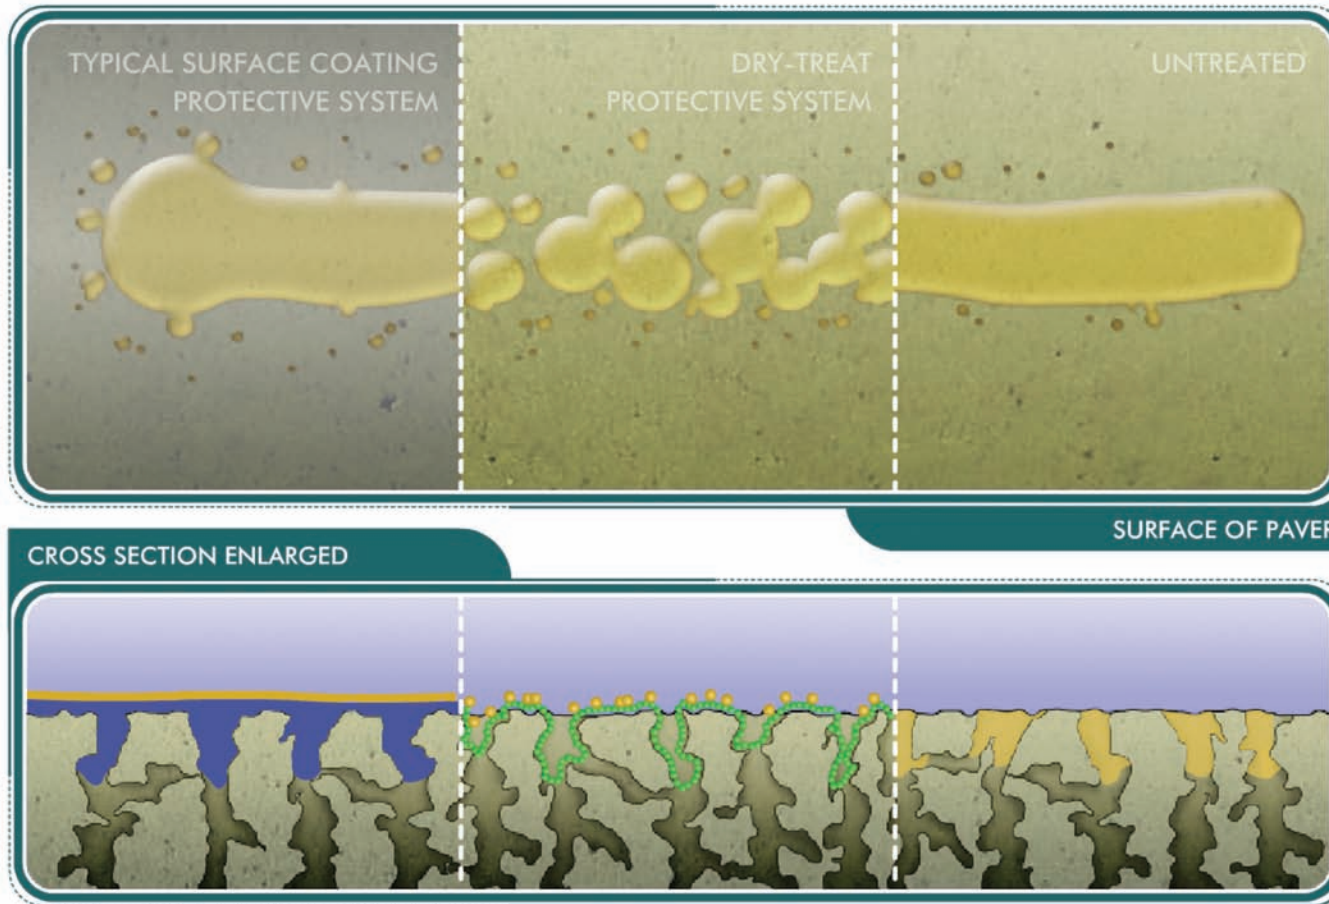

Dry-Treat sealers guard against surface staining ...

... and will not change the colour or appearance of the surface

# DRYTREAT

Excellence in sealing products™

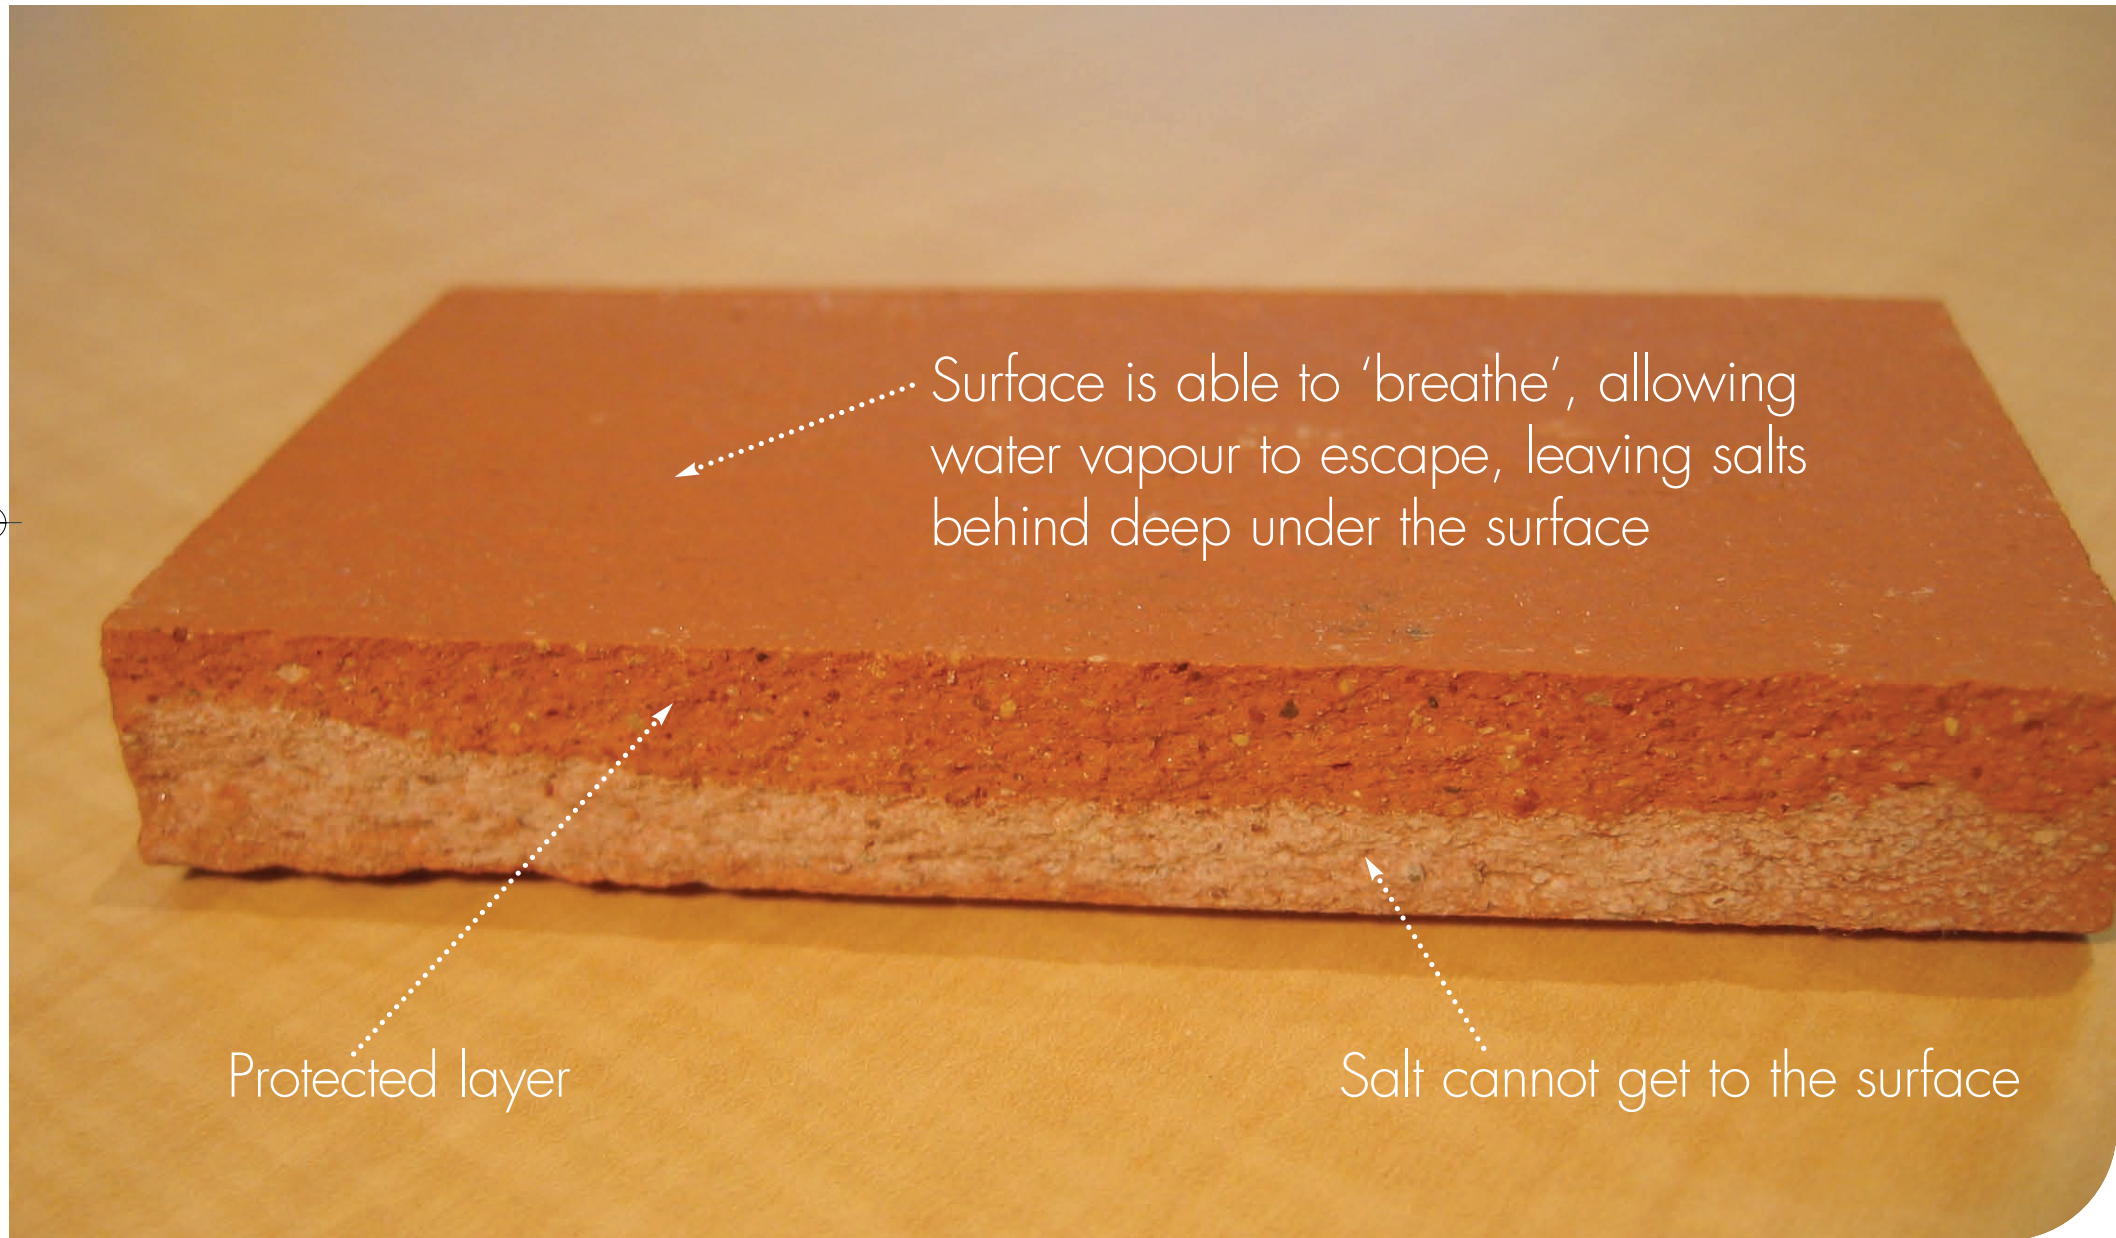

Dry-Treat sealers alter the surface energy of the treated material to a level below that of liquids, preventing their entry and thus staining. All Dry-Treat sealers are impregnating, and penetrate deep into the surface of the treated material. This deep penetration is critical to giving extreme longevity and protection against weathering and traffic which could remove the treatment.

Topical sealers consist of coatings which penetrate only into the top pores of the surface. These products can significantly change the appearance and slip resistance of the material being treated. They will also wear quickly over time and may haze or yellow, needing regular re-coating.

## Dry-Treat sealers protect surfaces against efflorescence and salt attack

Surface is able to 'breathe', allowing water vapour to escape, leaving salts behind deep under the surface

Protected layer

Salt cannot get to the surface

Other products: **ENHANCE-PLUS™**

**ENHANCE-PLUS™**  
provides a deep  
enrichment of colour  
with the benefits of an  
impregnating sealer  
to guard against stains  
and salt damage

# 15 year warranty for **STAIN-PROOF™**

Full performance warranty offered if applied by a Dry-Treat Accredited Applicator
